6/28/99 DICK RIORDAN

Dear Mr. Hedberg:

Small Mining Operation

Clarks Creek Quarry (Quartzite)

S/003/039 BOX ELDER CO.

Based upon recent and separate discussion with you, Bill Bown of Utah Building Stone Supply(UBS) and Ken Franklin of ROCKTILE Specialty Products; ROCKTILE, as the current record operator of the caption quarry, would be agreeable to having UBS operate, at this time, within the present quarry disturbed area and remove stone.

It is recognized that this would be an interim agreement until the pending transfer of the Notice-of Intent for the small mine from ROCKTILE to UBS is completed during the 1999 quarry season.

During the operation by UBS, the operation and reclamation practices (Rule R647-3-107, 108 & 109) incorporated in the Notice of Intention by ROCKTILE of Feb. 10, 1997 and the conditions mentioned in your March 11, 1997 acceptance letter of the N.O.I., would be observed and followed by UBS.

Yours very truly.

Richard F. Riordan, Consultant

cc: K.V. Franklin, ROCKTILE
Bill Bown, UBS
